DK: De resterende ThermoWood lister fastgøre til profilerne.

UK: Attach the remaining ThermoWood strips to the profiles.

DE: Die restlichen ThermoWood-Leisten an den Profilen befestigen.

FR: Fixez les moulures ThermoWood restantes aux profilés.

SE: Fäst de återstående ThermoWood-listerna på profilerna.

Vigtigt om flyverrust og produkter i stål:

Når du arbejder med produkter i stål, skal du være ekstra omhyggelig med at holde rent omkring stolperne når du bore huller. Selv enkelte efterladte stålsåner kan på få dage danne rustpletter på stolper/profiler og fliser.

Important information about rust and steel products:

When working with steel products, take extra care to keep the area around the posts clean when drilling holes. Even a few stray steel shavings can cause rust spots on posts/profiles and tiles within a few days.

Wichtiges über Flugrost und Stahlprodukte:

Wenn Sie mit Stahlprodukten arbeiten, müssen Sie besonders darauf achten, dass Sie beim Bohren von Löchern den Bereich um die Pfosten herum sauber halten. Selbst einzelne zurückgebliebene Stahlspäne können innerhalb weniger Tage Rostflecken auf Pfosten/Profilen und Fliesen verursachen.

Important concernant la rouille volante et les produits en acier :

Lorsque vous travaillez avec des produits en acier, veillez tout particulièrement à maintenir la propreté autour des poteaux lorsque vous percez des trous. Même quelques copeaux d'acier peuvent former des taches de rouille sur les poteaux/profilés et les dalles en quelques jours.

Viktig information om rost och stålprodukter:

När du arbetar med stålprodukter ska du vara extra noga med att hålla området runt stolparna rent när du borrar hål. Även några få stålsåner kan orsaka rostfläckar på stolpar/profiler och kakel inom några dagar.

Eks. som vil give rust hvis det ikke fjernes.

E.g., which will cause rust if not removed.

Beispielsweise verursacht es Rost, wenn es nicht entfernt wird.

Ex. qui provoquera de la rouille s'il n'est pas éliminé.

T.ex., som orsakar rost om det inte avlägsnas.
