DK: Fastskrues stille og roligt, da ThermoWood er sprødt og nemt kan flække, hvis der skrues for hurtigt.

Vi anbefaler brug af afstandsklodser, så afstanden på 10 mm overholdes.

Se forklaring og visning side 5.

SE: Skruva fast långsamt, eftersom ThermoWood är sprött och lätt kan spricka om det skruvas fast för snabbt.

Vi rekommenderar att du använder distansblock för att säkerställa att avståndet på 10 mm bibehålls. **Se förklaring och illustration på sidan 5.**

DE: Schrauben Sie die Schrauben langsam an, da ThermoWood spröde ist und bei zu schnellem Anschrauben leicht reißen kann.

Wir empfehlen die Verwendung von Distanzklötzen, damit der Abstand von 10 mm eingehalten wird. **Siehe Erklärung und Darstellung auf Seite 5.**

UK: Screw down slowly, as ThermoWood is brittle and can easily crack if screwed down too quickly. We recommend using spacer blocks to ensure that the 10 mm gap is maintained.

See explanation and illustration on page 5.
